In 2013, your new Lansing Economic Area Partnership (LEAP) has helped the private sector create 2,105 direct, private sector jobs and $466,824,000 direct, private sector investment. Those are historic numbers for Greater Lansing. And they do not include the counting of very important multiplier effects, indirect jobs or construction jobs.

In the first two years of the new LEAP (2012 and 2013), we have provided critical, value-added assistance to job creators resulting in 2,885 direct, private sector jobs and $565,064,000 in direct, private sector investment.

These projects are located throughout our Clinton, Eaton and Ingham county (Greater Lansing) region. And the projects cross all industries ranging from Fortune 500 national headquarters to high tech startups to advanced high tech manufacturing plants to agricultural development to advanced automotive sector expansions to urban mixed use projects.

Nearly all of these projects relied on key partnerships with our developers and LEAP private sector members, excellent local economic development partners, government officials and leaders, the Michigan Economic Development Corporation (MEDC), Capital Area Michigan Works!, the Lansing Regional Chamber of Commerce and many other agencies.

But the vast majority of these projects required LEAP’s direct work, from start to finish. Often times, these projects required a minimum of several months of nearly full time work to complete and, in some cases, well over a year to call it a success. Do a little simple math with our quite small staff and you will see the kind of night and day work we put into properly winning projects over national and globally competitive forces, sites and incentives.

Beyond just the bottom line numbers for your LEAP, there is the all-important programming that is rapidly building a region-wide incubation system, a business startup eco-system, an entrepreneurial mindset in our K-12 youth and MSU students/professors, talent development techniques and the development of placemaking strategies.

And this is just the tip of the iceberg for what is a very focused, but very comprehensive LEAP organization.

Beyond saying the obvious thanks to our LEAP-project job creators in our region, it is important to recognize LEAP’s Board of Directors/Investors:

Why do you give money to LEAP and sit at the region’s insider, leadership Board table? Because you are the leaders of the region. And this is your hometown. You wish to be aggressive about the region’s economic development efforts, because you wish to improve the lives of your employees, their families, your neighborhoods and local schools, your family and your neighbors. You also want to see overall improved, direct business opportunities for your business. Finally, you want to see a business and community environment that helps you retain and attract world class talent.

And you have the progressive knowledge that we can only individually succeed by competing on the global stage, as one united, effective region. That is who a LEAP Board member is.

And we are doing it. Big time! Thank you, thank you, thank you for allowing us to do the work our once sleepy region deserves. We’re now a significant national and global player. Thanks to our Board members, private and public alike, for your all-important financial investment.
A Message from the Chairman & President

The Lansing Economic Area Partnership is a coalition of area leaders committed to building a prosperous and vibrant region where business can thrive. To do this, we help entrepreneurs start new businesses, help existing businesses grow, and attract new businesses to the region. LEAP is the economic development organization proudly representing the tri-county region of Clinton, Eaton and Ingham counties in partnership with the Michigan Economic Development Corporation.
"You raised the bar for all other Economic Development folks to aspire to!"

### STAGE 1 BROWNFIELD - PROJECT PREPARATION

- 18 Projects*
- $210,042 distributed to clean up properties funded by Environmental Protection Agency (EPA) administered by LEAP.

*Work completed by LEAP along with three, LEAP member environmental firms, PM Environmental, AKT Peerless, Triterra as well as SME.

### RETENTION VISITS - LEAP/MEDC

- 106 visits in 2013

---

Bob Trezise, Jackson National Life CEO, Mike Wells and City of East Lansing Director of Planning, Building & Development, Tim Dempsey at the Jackson National Life Zone opening.

The Marketplace project being constructed next to the Lansing City Market will open in Fall 2014 with 80 residential units on the Riverfront and an investment of $8.5 million.
LANSING REGIONAL ECONOMIC PARTNERS ENGAGEMENT SURVEY RESULTS

My organization has experienced increased opportunities because of LEAP’s efforts.

The regional partnership has grown my organization’s opportunities.

I feel positive about the direction LEAP is pursuing in defining our regional mission.

The LEAP team is available for me when needs arise.

2012/2013 PROJECTS
Accelerator Region Report
The Accelerator Region Task Force is focused on developing and implementing the Michigan Accelerator Region Strategy (MARS), which will position our region to be the Accelerator Capital. The Task Force includes representatives from Michigan State University (MSU), Niowave, Inc., MSU Facility for Rare Isotope Beams (F-RIB), Lansing Regional Chamber of Commerce, MSU Technologies and others. In 2013, the Task Force submitted a request to the MSU Urban and Regional Planning Program (URP) for support to begin the development of a strategic assessment of the economic, entrepreneurial and community impacts and opportunities presented by the development of the F-RIB and Niowave. Recognizing the importance of MARS, URP approved the request and assigned five of their top students to assist the Task Force. Through the MSU URP Practicum Program, the students will present their results in the 2nd Quarter of 2014. Secondly, members of the Task Force have been actively participating in community outreach efforts. The Task Force developed a comprehensive presentation that is being presented at community groups throughout the region.

Automotive Industry & Property Task Force Report
The Automotive Industry and Property Work Group (Manufacturing) has met monthly to discuss two items 1) How to work together, across municipal boundaries, to re-develop the former GM sites now owned by RacerTrust and 2) Continuous strategic work regionally with GM and suppliers to grow and attract further GM and auto supplier work. Accomplishments include: A major auto supplier targeting study was completed by LEAP, RacerTrust held a site consultant conference about the Racer sites and some positive municipal relationship work has occurred. But now we see the group morphing into more of a general manufacturing work group, while still working on RacerTrust and GM issues.

LEAP Tri-County Regional Economic Partners | L-TREP
The LEAP/Tri-County Regional Economic Partners (L-TREP) is a LEAP Work Group that meets monthly to discuss regional economic development policy, regional planning issues and economic development projects. In 2013, the group successfully completed what is called a CEDS list of best-prepared regional economic development projects. Placement on the CEDS list, makes a project potentially eligible for federal Economic Development Agency (EDA) funding. Secondly, the group completed an additional list of ranked, regional economic development projects based on which project had the potential for most widespread regional impact. This helps the region in discussions with the MEDC on incentive use. Finally, the group pulled together the local economic development community to enhance trusting relationships and to create more effective, open communications between the MEDC, LEAP and local economic development partners/communities.
Michigan Avenue Corridor Improvement Authority

The Michigan Avenue Corridor Improvement Authority (CIA) Work Group is a collection of key board members from the City of Lansing, City of East Lansing and Lansing Township as well as their respective staffs. LEAP continues to serve as facilitator and mediator for the collective group. In 2013, LEAP assisted with the formation of the City of Lansing CIA Board. The City of Lansing CIA Board will continue to meet quarterly in 2014 soon to join with the East Lansing Corridor Improvement Authority and Lansing Township Corridor Improvement Authority.

The remaining steps will be completed in 2014 to form the Combined Joint Authority Board and set the Tax Increment Finance Plan with 2014 as the base year. LEAP is also working on the Saginaw and Cedar Street Corridor Improvement Authority with the City of Lansing and Delhi Township.

Agricultural Development

The LEAP Agriculture and Food Business Workgroup had a very productive year in 2013 including partnering with the MSU Food Processing and Innovation Center (FPIC) and the Michigan Food Innovation District (MFID). The workgroup is also moving forward with a wheat milling feasibility study, business retention calls and marketing efforts to bring local producers and consumers together. LEAP has also hired Keith Lambert, a recent MSU grad, as a fulltime Out-County Economic Developer who will work in all three counties with special attention to agricultural and food processing development.

“I wanted to thank you for supporting me in my entrepreneurial ventures by awarding me The Hatching contest money. Since the contest, the money has gone towards vital back end managerial costs. Because of this additional money invested in my company, I have landed new clients and added a few new people to my team. I can not thank you enough for this help.”

Nicholas Stachurski
The Hatching Winner
The Lansing Regional Incubation Network features many different types of business incubators including two food/agriculture incubators, Allen Market Place and Incu-Bake.

Alongside the Technology Innovation Center (TIC), MSU Technologies and Spartan Innovations, The Hatch has become a haven for student entrepreneurs from our region. Open to all students, The Hatch offers a collaborative work environment for students who are working to launch a company.
With a partnership between LEAP, Spartan Innovations and the NEO Center, this pitch competition is as uncomplicated as they come. Each month entrepreneurs submit their ideas to the website, TheHatching.org. Through popular vote, five are chosen to pitch their idea at The Hatching event on the last Wednesday of the month. After the pitches are complete, the panel of judges deliberate and present the winner with $1,000. The only catch is that the entrepreneur must form an LLC within the region in order to receive these funds. At the end of the year, each monthly winner competes again for the chance at $10,000. In 2013, What’s Mapnin’, an online and printed caricature map, won $10,000 to pursue the next phase of business growth. Charlotte Master of What’s Mapnin’ is a sophomore at Michigan State University who had already seen $80,000+ in revenues from her idea.

The best part of The Hatching? It’s an event open to the public and has become the who’s who monthly gathering of our region’s entrepreneurial eco-system.
The first of its kind in the state, The Runway has been gaining support from all over the country. Designers, entrepreneurs and creative individuals, have begun to join the planning committee to get the project up and running. The project began as part of the Lansing Economic Development Corporation’s plan to revitalize downtown with a technology incubator to be located on the first floor of the iconic Knapp’s department store building. After much research, the project took on a new focus and will now be centered on fashion and design, a budding and promising industry in the mid-Michigan area and state-wide. The Runway will be operational by mid-2014.

The 3D Lansing Rapid Prototyping Program is housed at the Technology Innovation Center (TIC) in East Lansing. LEAP operates the program on behalf of the Lansing Regional SmartZone. The program offers access to two 3D printers (MakerBot Replicator 2 and Objet 260v), a 3D scanner and full AutoCAD Design Suite Services. LEAP will begin full management of the TIC in July 2014.
Lansing Regional SmartZone
The Local Development Finance Authority (LDFA), also known as the SmartZone, has contracted for management services with LEAP since 2011. This partnership was renewed in 2013 with a renewed plan for long-term sustainability of programming. This new plan identifies a strategy for removing legacy debt, expanded programming and consolidated services. The sustainability plan also includes the expansion of the TIF Boundary and the LDFA Board itself. The expansion has already proven successful in bringing key members of Michigan State University innovation staff to the LDFA Board. Strategic alignment with MSU and expansion of services will allow for the LDFA to expand its offerings in 2014 to potentially include a Wet-Lab Incubator, to better service Bio-Technology based businesses.

Regional Incubation Network | RIN
2013 was the inaugural year for LEAP’s Regional Incubation Network. The RIN is a collection of key members of business incubators in the Greater Lansing community. These members drafted a Memorandum of Understanding (MOU) and a preliminary policy that outlines the benefits of membership in the RIN. Together with the MOU, the workgroup and staff released a Request for Proposals (RFP) for business incubators in the region. The RFP asked for incubators to submit proposals that outlined key needs for their programming that would allow for the expansion and continuation of services offered. Three organizations received funding based on their proposals: Incu-Bake in Delhi Township, Allen Market Place in Lansing and the MARC in Meridian Township.

The RIN Workgroup intends on releasing a second RFP in 2014, along with solidified branding and marketing, and a more robust set of shared services and best practices for members of the workgroup.

“We appreciate the LEAP organization moving forward and being assertive on economic development. Good things growing from good works.”

Marty Colburn
City Administrator,
City of Mason
WHY IS PUBLIC ART ECONOMIC DEVELOPMENT?
The existence of public art signifies a strong arts and culture presence in a community. Public art, arts and culture, signify to talented job candidates and their spouses that this is a community on the rise with plenty of hope, wealth and opportunities for a high quality standard of living. Public art also helps us shed the “rust belt” label.

A Great Place to Start artist, Tom Sheerin, C2AE’s Rusty Owens, DeWitt Township Supervisor Rick Galardi and Bob Trezise admire the new piece of public art in DeWitt Township. This piece was made possible by the LEAP Public Art for Communities grant.

City of Mason Mayor, Leon Clark, City Administrator, Marty Colburn and Bob Trezise unveil “Silver Respite” alongside artist, Dace Koenigsknecht along Jefferson Street at the Hayhoe trailhead. This piece was made possible by the LEAP Public Art for Communities grant.

LANSING CELEBRATES YOUTH ENTREPRENEURSHIP

In 2013, LEAP was granted funds from the Michigan Economic Development Corporation to develop and implement a region-wide youth entrepreneurship program. Working with The Generation E Institute, 58 local community educators were certified in the entrepreneurship curriculum. Additionally in 2014, these educators will bring their students, alongside Junior Achievement, 4H, BPA and DECA students to compete at the first ever Lansing Celebrates Youth Entrepreneurship showcase at the Lansing Center.
In 2012, LEAP and partners formed the Global Lansing initiative. That same year, LEAP worked with the group to apply for a grant from the Michigan Economic Development Corporation to create the “Getting Started Fellow” Program. The program connected international students with local businesses for internship opportunities. Since then, the committee has begun working to establish a mission and vision to begin work in other areas including immigration, refugee support and foreign-born entrepreneur support.
2013 NOTABLE LEAP ACCOMPLISHMENTS

Successful 2013 fund raising: $116,000 new revenue raised, 100% collection and 85% collection by January 31, 2013

Completed a successful office move on time and under budget

Received $10,000 administrative grant from Michigan Economic Development Corporation to run regional economic development

Historic membership: Eaton/Clinton counties joined Ingham County at same funding level to support LEAP

Introduced two State bills (passed and soon-to-be signed) to allow for re-financing of Lansing's TIFA, saving the City of Lansing taxpayers $1.4 million annually

Completed, published and distributed LEAP's first ever Year End Report

Clean and “best ever” audits successfully completed for: LEAP, LEAP Foundation, LEDC, LBRA, TIFA and LDFA

Received $20,000 Insurance Attraction Strategy grant from Michigan Economic Development Corporation

Appointed to Michigan Economic Development Corporation’s Sales Targeting Steering Committee

Successfully completed the STEP export initiative program at 195% of goal according to Michigan Economic Development Corporation

Niowave/Walnut Neighborhood “Pole Barn” dispute was successfully negotiated and resolved by LEAP

Received $500,000 Michigan Economic Development Corporation grant for LEAP to run the Lansing Regional SmartZone (LDFA)

Created and completed deal with East Lansing/Michigan State University to allow the Michigan Economic Development Corporation and Michigan State University to pay for old build-out costs of Technology Innovation Center, valued at $750,000, which allows for new revenue to be spent on entrepreneurial programming

Completed Renaissance Zone/Next Michigan state qualifications at the airport

Received $90,000 grant from the Michigan Economic Development Corporation for the creation and implementation of a youth entrepreneurship program with the Generation E Institute

Received $20,000 grant from the Michigan Economic Development Corporation to implement programming for Global Lansing

Partnered with Lansing Community College to create a Diversity and Inclusion Initiative

Received SalesForce grant from Michigan Economic Development Corporation to implement regional shared customer relationship and project management

Presented to state economic development leaders as the top SalesForce program in the State

Partnered with Capital Area Michigan Works! and Lansing Community College on the Governor’s Regional Talent Summit

Developed new LEAP website
